

# Mr. New's Art Class

## Portrait Construction

### Directions

1. Tape this sheet to the back of a sheet of drawing paper.
2. DO NOT TRACE!
3. Instead, use this sheet as a GUIDE for where each part of the face should be, and how big to make each part of the face in proportion to each other part.
4. When your portrait is complete, untape this sheet and keep it for a future project.
5. For more details on facial proportions, check out my portrait playlist at:
